**NEW YORK, NEW YORK – MILES McENERY GALLERY** is pleased to announce the representation of the artist Alexander Ross.

Alexander Ross has been exhibiting his paintings and drawings throughout the United States and Europe for over twenty-five years. Best known for creating mysterious imagery based on organic processes, Ross's works are informed by petri dishes—where various elements might grow, decay, and reproduce.

Ross's masterly approach to the uncanny and biomorphic is steeped in surrealist tradition, where enigmatic landscapes and forms repeatedly defy a simple categorization. He predominantly uses various hues of green to reference both plant life and the artificial, often seen in contrast to blues and reds. The works are a bridge between abstract and photorealistic; his compelling application of shadow and texture interact with color and form to create images with a deep dimensionality.

**ALEXANDER ROSS** (b. 1960 in Denver, CO) received his Bachelor of Fine Arts from the Massachusetts College of Art, Boston, MA.
